PROFILE SUMMARY

Computer Science student with project-based experience, working on various web apps and websites using frontend and backend technologies. Proficient in multiple programming languages, including JavaScript, HTML, CSS, and MERN stack; and strong understanding of web development concepts such as responsive design and cross-browser compatibility. Demonstrate exceptional problem-solving and communication skills, with the ability to learn quickly under senior developers. Seeking a junior web developer position within a growth-oriented engineering team to build technology solutions for users.
